THERMOBURR

Mechanical Metal Finishing provides contract thermal energy deburring as well as engineering and technical assistance. This state-of-the-art method for deburring and deflashing is the quickest and most consistent procedure known. It accomplishes what is impossible to achieve with conventional deburring.

Our electro polish department processes many sizes and shapes of stainless steel. Sheet metal, machined parts, and forgings are among parts processed.

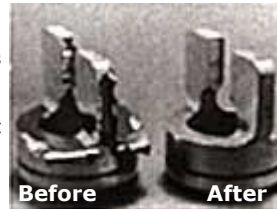

Zinc computer terminal plugs

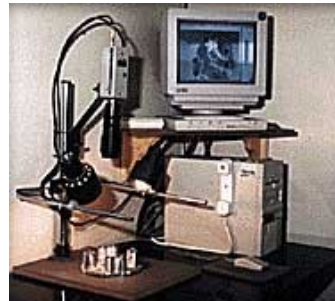

THERMOBURR is extremely effective on zinc casings. High volume bulk loading will produce consistent deburring quality while keeping the part cost down.

Aluminum electrical connectors

THERMOBURR removes machining burrs that tumbling cannot and eliminates a costly hand deburr operation.

We are striving for a paperless computer driven system and ISO 9002 certification.

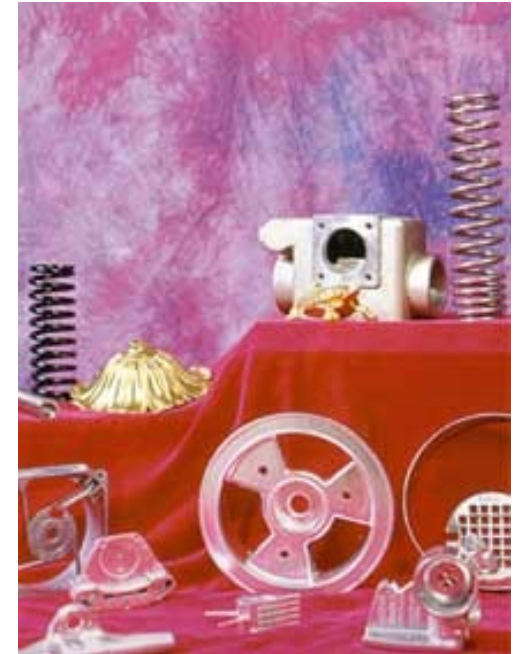

Our automated tumble blasting equipment helps us achieve uniform finishes. We can tumble or carefully fixture your parts.

Our Finish Sells Your Product

**55 Years Serving
Our Satisfied Clients**

Mechanical Metal Finishing was founded in 1957. We have successfully served the needs of thousands of manufacturers and other job shops, large and small.

Mechanical Metal Finishing provides

We are able to ball burnish very large pieces and small pieces. These bicycle frames are an example of our capacity.

The Proven Process

We are the Proven Process Experts with the following:

- **Abrasive Cleaning**
 - Plastic Bead Blasting
 - Glass Bead Blasting
 - Aluminum Oxide Blasting
 - Vapor Hone (Air Only)
- **Ball Burnishing**
 - Barrel/Vibratory
- **Chemical Deburring**
 - Kembrite Process/Chemical Cleaning
 - Accelerated Chemical Milling Process
- **Deburring**
 - Tumble Deburring/Vibratory
- **High Energy Deburring**
 - Centrifugal Barrel Finishing
 - Centrifugal Disk Finishing
- **Stainless Steel Cleaning**
 - Certified Passivation
 - Electro Polishing
 - DS-9 Process
- **Thermoburr**
 - Zinc, Aluminum, Steel
 - Stainless Steel, and Brass
- **Degreasing**
 - Bulk Parts Cleaning
 - Ultra Sonic Cleaning
 - Solvent and Oil Cleaning

Finishing Types

Centrifugal barrel finishing uses high energy to reach difficult edges. We have the largest line of CBF equipment ready to serve you.

Centrifugal disc finishing is also part of our high-energy small lot department. Disc finishing completes our line and offers options to various deburring challenges.
